Attachment 1 – Schedule of West Riser SRAWP Activities

Section 1 – Introduction

This progress report for the West Riser Tide Gate Sediment Removal Action located in the Boroughs of Wood-Ridge and Carlstadt, New Jersey summarizes the status of remedial actions being performed as described in the West Riser Sediment Removal Action Work Plan (SRAWP), approved by the United States Environmental Protection Agency (USEPA) on September 9, 2009. The progress report covers the period from January 1, 2010 and February 5, 2010. The progress report is being submitted pursuant to the Administrative Consent Order (ACO) between Morton International, Inc. and the USEPA as well as the monthly progress reporting requirements of the SRAWP. This report has been prepared in a similar format as that used for the remedial action underway at the adjacent Ventron/Velsicol site.

The components of the remedial action presented in the SRAWP are as follows:

- Cofferdam construction
- By-pass pumping system installation and operation
- Monitoring
- Sediment removal
- Cofferdam removal
- By-pass pumping system breakdown; and
- Site restoration

The progress report is organized as follows:

- Section 1 – Introduction;
- Section 2 – Remedial Actions Summary;
- Section 3 – Permitting Application Status; and
- Section 4 – Sampling Results and Waste Generated

Section 2 – Remedial Actions Summary

2.1 Remedial Actions Status

This section summarizes the status of remedial actions at the Site for the reporting period. **Table 1**, attached, provides a summary of remedial actions and the status of each. Remedial actions performed during this period include:

- Related Site Activities
 - Sediment Disposal
 - The disposal of excavated sediment was completed this period, including the disposal of hazardous and non-hazardous sediment. Waste disposal is discussed further in Section 4.
 - Remedial Action Report
 - Work continued this period on the Remedial Action Report.

2.2 Deviations and Modifications

No deviations from or modifications to the SRAWP occurred during this reporting period.

2.3 Remedial Actions to be Performed Next Period

The following remedial actions are scheduled to be performed during the next reporting period (February 5, 2010 to March 5, 2010):

- Related Site Activities
 - The Remedial Action Report will be submitted.

2.4 Schedule of Remedial Activities

The schedule of West Riser SRAWP remedial activities at the Site is provided in **Attachment 1**.

2.5 Problems or Delays

There were no problems or delays this period.

Section 3 – Permit Application Status

The permit application status for the project is presented in **Table 2**. No permit applications were submitted in this progress report period.

Section 4 –Sampling Results and Waste Generated

4.1 Sampling Results

No sampling results were reported this period.

4.2 Waste Generated

Non-hazardous excavated sediments were removed from the Site by truck and sent to the Greentree Landfill operated by Veolia Environmental Services in Kersey, PA for disposal. Mercury impacted sediment with TCLP mercury concentrations at or greater than the RCRA limit of 0.2 mg/l. were removed and sent to the Stablax Canada facility in Blainville, Quebec. A summary of waste sent off-site is included as **Table 3**.

Tables

Table 1 - Remedial Actions between January 1, 2010 and February 5, 2010
 West Riser Tide Gate Sediment Removal Action
 Wood-Ridge and Carlstadt, New Jersey

Remedial Action	Description	Scheduled this Period?	Status	Comments
Cofferdam Construction	Increase Height of Downstream Cofferdam by 6"	No	Completed in a previous period	The 6-inch extension of the downstream cofferdam was completed this period.
	Cofferdam Removal	No	Completed in a previous period	The upstream and downstream cofferdam were removed.
Installation of by-pass pumping systems	Pump installation	No	Completed in a previous period	Installation of four 12 inch pumps and two 24-inch diameter pumps was completed.
Operation of by-pass pumping systems	Operation of pump system to by-pass space between cofferdams	No	Completed in a previous period	The by-pass system was in operation this period.
Removal of by-pass pumping systems	Removal of pump system	No	Completed in a previous period	The by-pass system was removed upon the completion of backfilling
Sediment removal and Backfilling	Sediment Excavation	No	Completed in a previous period	Excavation of all zones was completed this period.
	Backfilling excavated zones	No	Completed in a previous period	Backfilling of all zones was completed this period
Site Restoration	Site Restoration	No	Completed in a previous period	Topsoil and seed were placed, and erosion controls were implemented.
Related Site Activities	Sediment Disposal	Yes	Completed	Additional analysis of the stockpiled sediments was performed to meet the requirements of the selected disposal facility. Excavated sediment was taken off-site to a waste facility for disposal.
	Decontamination and Demobilization	Yes	Completed	Site equipment was decontaminated for sediment contaminants and taken off-site.
	Remedial Action Report	Yes	Ongoing	The Remedial Action Report is ongoing.

Notes:

¹ Excavated sediment sent for offsite disposal was classified as non-hazardous pursuant to 40 CFR 261 except where noted

² A manifest was assigned to disposal shipments, including non-hazardous soils. Manifest tracking was performed by Veolia Environmental Services.

³ Greentree Landfill located in Kersey, Pennsylvania, operated by Veolia Environmental Services.
